

Smart Routines — streamlining HR for the modern enterprise

Say goodbye to cumbersome HR tasks and hello to Smart Routines, your go-to platform for automating HR processes. Seamlessly integrated into your existing SharePoint and Office 365 environments, Smart Routines is designed to minimize your operational costs and maximize efficiency.

Simplified benefits enrollment

When benefits enrollment season hits, internal service tickets can surge. SmartRoutines gives employees a straightforward path to enrollment resources, reducing the hassle and the ticket count.

Efficient employee onboarding

Onboarding doesn't have to be a resource-draining task. With Smart Routines, you can significantly reduce the cost per onboarding transaction, achieving both scalability and cost-effectiveness.

Streamlined decision-making

Approvals and clearances are essential HR functions that can sometimes slow down workflow. SmartRoutines ties these decisions into your daily tools, simplifying tasks for everyone involved.

Time-saving automation

SmartRoutines takes care of the repetitive, time-consuming HR tasks that can slow down your team. The time you save can be channeled into strategic, people-first activities, enabling you to not only streamline your operations but also enhance the human element of your HR functions.

Key features:

- **HR self-services**
Empower your team with custom portals for autonomous HR task management.
- **Integrated data**
Cut through the information clutter with a unified data source for easy access by employees and managers alike.
- **Guided procedures**
Navigate routine HR processes effortlessly with our prebuilt modules, minimizing the need for additional HR oversight.
- **Microsoft Office & SharePoint integration**
Enrich your existing work environments by integrating Smart Routines, making your HR processes as mobile as you are.

GenAI-powered insights with Smart Routines CoPilot

Discover quick, actionable insights on your workforce with Smart Routines CoPilot. As an easy-to-use add-on, CoPilot takes the hassle out of report analysis. Just click "Generate Insights" in the Smart Routines reporting section, and let GenAI do the rest.
