Platinum Services For

PROLOGIC

IgniteTech's Platinum Support Program is designed to deliver a higher value experience to include customized, professional services. That's why, in addition to the benefits outlined in IgniteTech's Platinum Support Program for all IgniteTech solutions, the following Prologic solution-specific professional services are also included in our Platinum Support Program for Prologic customers.

Stock Allocation Insights

Our experts will help reduce overstock and out-of-stock levels by running analytics against your stock data to find patterns of stock combination performance in different sales channels and locations and make recommendations to your stock allocation team. This reduces shipping costs for replenishment and stock re-allocation, ultimately reducing overstock and stockout levels.

Full Service Maintenance

When anything changes in your business or supply chain, existing Prologic optimizations may no longer be optimal. Our team will suggest and implement changes on schedules and tasks in "queues", upgrade you to the latest version so you get the most from CIMS, support third-party hardware changes to your CIMS environment as needed, review your database in order to provide performance recommendations, and implement them once approved.
