

Jive CoPilot: Your AI-Powered Collaboration Assistant

Tackle the complexities of enterprise content with Jive CoPilot.

This powerful AI feature integrates a user-friendly chatbot for quick content understanding, summarization, and discovery. Jive CoPilot empowers your workflow with efficiency, security, and a focus on the user experience.

- ✓ Quick Content Comprehension and Summarization
- ✓ Better Content Discoverability
- ✓ Secure and Integrated User Experience

Key Features

- **Content Comprehension and Summarization:** Understand complex text-based content quickly and easily, allowing for more efficient information consumption.
- **Enhanced Discoverability:** Find the most relevant content with ease through generative AI-powered interactions.
- **Access Control Compliance:** Strict adherence to existing Jive access controls ensures the AI operates securely within a user's permissions.
- **Multi-Content Support:** Works with all text-based content, with the potential to support images, audio, and video in the future.

 Challenge	 Solution
--	---

Overwhelming Content Volumes	Jive CoPilot reduces the time needed to understand large amounts of content, boosting efficiency and saving you time.
Difficulties in Content Discovery	Jive CoPilot's advanced AI makes finding what you need easier, streamlining your workflow and access to information.
Ensuring Security and Privacy	Jive CoPilot's focus on access controls and transparency provides peace of mind that user data and privacy are protected.

Jive CoPilot makes complex content easier to manage with a powerful AI chatbot that simplifies understanding and search.
