- Increase customer satisfaction?

STREETSMART WILL HELP YOUR ORGANIZATION:

Increase Productivity

- Drive accountability
- Shorten travel time
- Improve field communications

Improve Visibility

- Proof of service
- Customer feedback
- Worker locations & activities

Gain Efficiencies

- Shorten time to invoice
- Integrate systems
- Streamline payroll & expense processes

STREETSMART COPILOT:

StreetSmart CoPilot is a GenAI assistant designed to streamline field force operations and decision-making. Instead of navigating complex reports, managers can pose questions to CoPilot in the Mission Control Portal for instant insights, turning queries into actionable information. Field force workers approaching a job site receive a GenAI-curated customer overview from the StreetSmart App, covering customer history and other relevant details.

On-site, workers communicate their progress to the Mobile StreetSmart CoPilot, which then helps with form completion, provides additional prompts, and recommends solutions based on past jobs and product insights. StreetSmart CoPilot helps save time, reduce operational costs, and ensure consistent, high-quality results.
