

## REMOTELY WAKE COMPUTERS AND OPTIMIZE POWER MANAGEMENT

IgniteTech's Verdiem lets IT departments remotely wake computers so your teams can deploy necessary security updates. Verdiem also helps optimize power management across the enterprise — so your organization can stay on top of security and reduce energy use, saving time and money.

### IMPROVE EFFICIENCY, SECURITY AND COMPLIANCE

Verdiem's EvokeIT allows IT professionals to easily and reliably wake endpoint devices and perform software distribution and patch management tasks remotely from a central control center. By using Verdiem, you can wake endpoint devices and deploy software, update drivers and maintain user systems with greater efficiency, resulting in minimal operational downtime.

Verdiem enterprise wake capabilities ensure that your device fleet is always ready when you need to push patches, apply updates or perform other maintenance activities. With Verdiem, you're able to keep endpoint devices up-to-date from both a software and driver perspective, improving efficiency, security and compliance.

#### *Verdiem provides:*

- **Enterprise PC Wake** — Reliably wake the computer fleet for security updates and patch management.
- **Centralized Administration** — Centrally control a network of computers and tablets without worrying about external factors.
- **Analytics Reporting** — Reporting dashboard provides actionable information on asset inventory as well as wake-related reports.
- **Plugins to Desktop Management Systems** — Plugins to common systems management products like System Center Configuration Manager (SCCM) make administration of Verdiem seamless.

### KEY BENEFITS

- Improve security and compliance by achieving 95%+ wake success for patching
- Increase energy savings by an additional 30 - 60%
- Reduce IT labor and costs
- Streamline the administration of endpoint devices
- Enhance analytics capabilities with exhaustive reports that use the very detailed data collected on energy usage, savings opportunities and underutilized devices

## OPTIMIZE SAVINGS AND IMPROVE ENERGY BENEFITS EFFICIENCY

As a power management solution for PCs, Macs, and Windows tablets, Verdiem's Surveyor provides a unified approach for IT device data collection, policy management, administration and analytics. Verdiem offers the most accurate approach to energy management and measurement and can reduce your IT energy costs up to 60%.

Verdiem helps accurately measure computer and tablet energy consumption, allowing you to enforce policies for greater energy efficiency and optimize savings.

*Verdiem delivers three IT efficiency solutions in a single integrated product:*

- **PC Power Management** — Reducing PC energy usage starts with establishing a baseline of current energy usage data. Verdiem automatically detects and groups devices to capture accurate energy usage data and leverages the data to reduce power consumption.
- **Enterprise PC Wake** — Verdiem reliably wakes the PC fleet for security updates and patch management.
- **End User Print Analytics** — Uniquely monitor end user print activity and compile actionable data for devices and the people who use them.

### VERDIEM COPILOT

Verdiem CoPilot, powered by GenAI, offers a robust solution for automated reporting on computer fleet activity. Business stakeholders can click on "Generate Insights" to get concise, user-friendly summaries of CPU and display usage. By pinpointing opportunities for reducing power consumption in inactive modes, Verdiem CoPilot simplifies data analysis and facilitates more efficient energy use, leading to both time and cost savings.
