

Computron securely handles accounting and business management processes while adapting to evolving regulations

- Ensure compliance with financial reporting and regulations.
- Provide reliable, professional information for investors and shareholders.
- Automate invoicing/payment activities for quicker cash conversion.
- Streamline tax filing.

✦ Computron CoPilot

Computron CoPilot is a GenAI-powered assistant that simplifies workflow automation. When users work with forms or invoices, CoPilot offers template suggestions and predictive text, expediting data entry. Each transaction is automatically checked against industry rules and regulations, and discrepancies are flagged. Furthermore, it monitors transaction patterns, alerting users to anomalies that might indicate errors or fraud. With Computron CoPilot, users process financial tasks faster, reduce errors, and ensure compliance with industry standards.

With Computron you will

- Improve inventory accuracy.
- Boost efficiency through quicker, more informed decisions.
- Save time by reducing the amount of manual data entry.
- Improve inventory accuracy.

Ensure high-quality and accurate accounting and business process management with Computron

- Quickly configure your core business management processes to meet your specific needs.
- Enhance a wide range of critical tasks with smart tools for efficiency and accuracy with receivables & collections management, adjustment processing, cash disbursement approval, rule-based cash receipting, payment reconciliation, and more.
- Easily integrate with other databases and leverage interactive dashboards, proactive alerts, and predictive budget modeling.
