

THE NEW STANDARD FOR SUPPLY CHAIN OPERATIONS

*Solving the gaps left by traditional PLM, ERP,
and your Legacy Tech Stack*

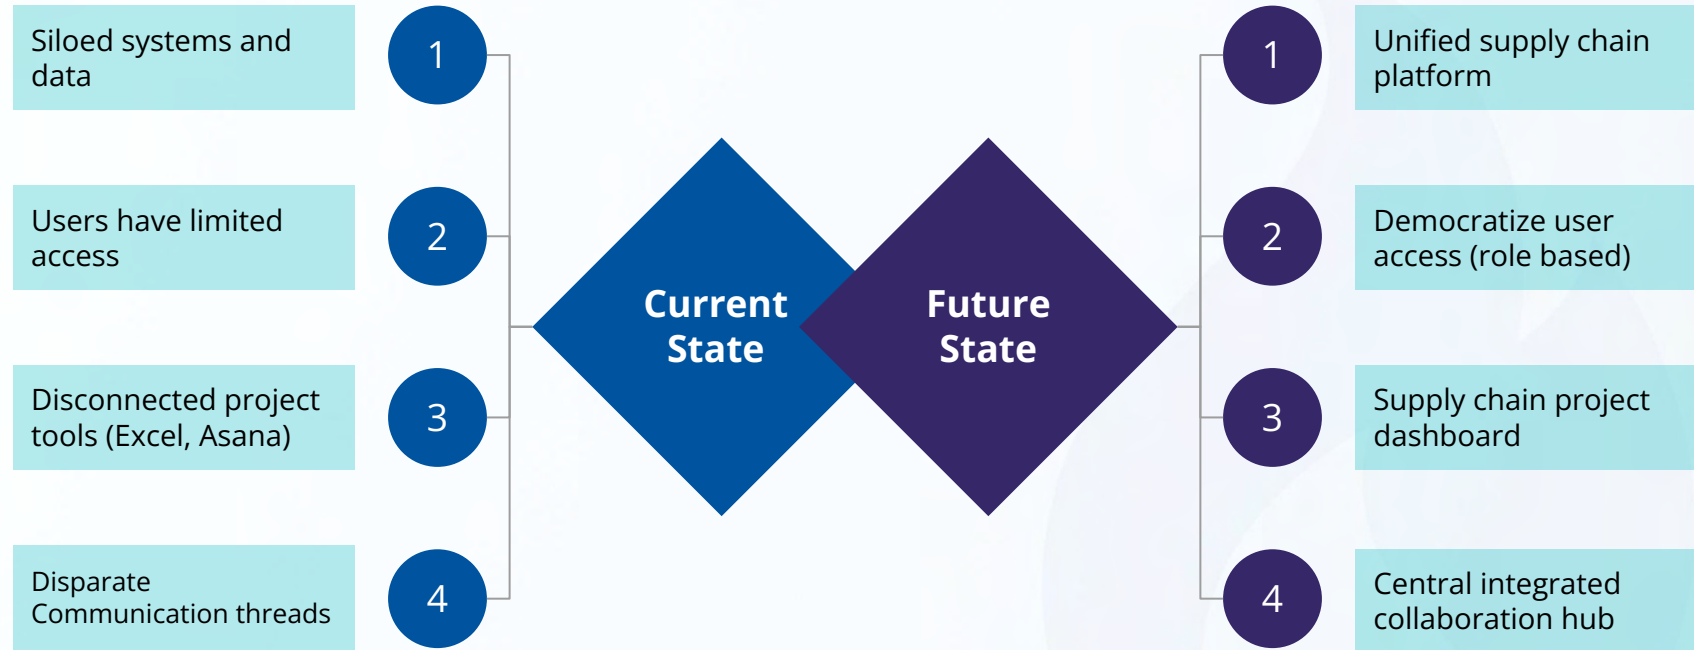

Fragmented Supply Chain Tech Stacks are **Error Prone** & **Stunt Growth**

Broken Supply Chains slow down growth and kill companies

Connected, intelligent supply chains drive exponential growth

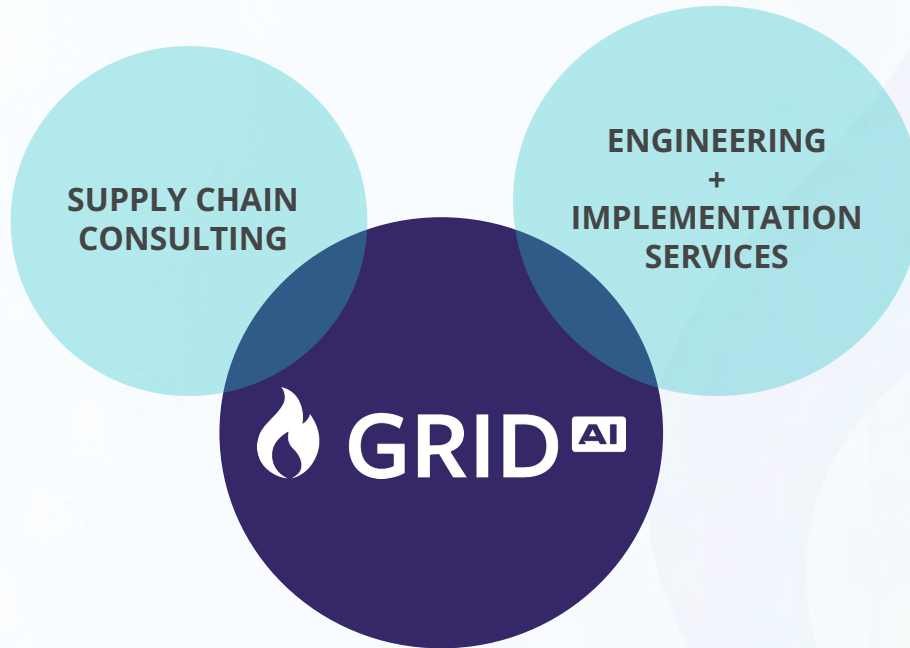

As companies scale from \$10M to \$100M to a \$1B+, they need a solution that can help them **migrate from excel sheets and point solutions.**

The GRID serves as that **connective tissue and single source of truth**, combining the best features of PLM & ERP with project management and procurement functionality.

The GRID can function as the system of record or work with the underlying technology stack and ERPs to provide an effective layer for operations, collaboration, and productivity.

Software platform + thought leadership

The Suuchi offering drives maximum impact and RoI by defining and executing on a winning supply chain strategy in conjunction with implementing our GRID platform

Suuchi GRID – Solution Overview

Core Cloud Suites

Upstream Product Management (PLM)

Downstream Supply Chain Management (ERP)

Differentiators

Communication and
Collaboration

Project Management

Vendor & Customer
Management

Reporting and
Analytics

1. Integrates with tech stack

2. Easy Configuration

3. Intuitive UI/UX

Run your entire supply chain in one place

The GRID's end-to-end product suite allows customers to start with a subset of products and expand.

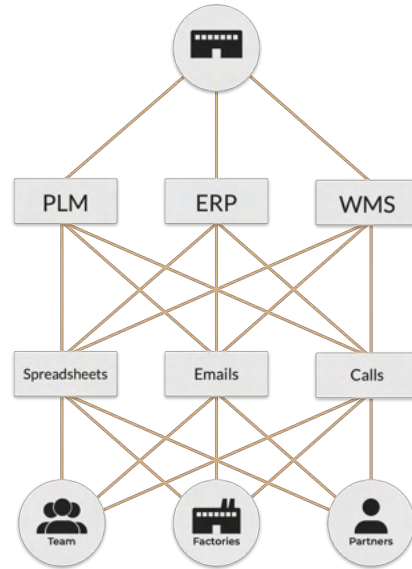

* Functionality across the platform

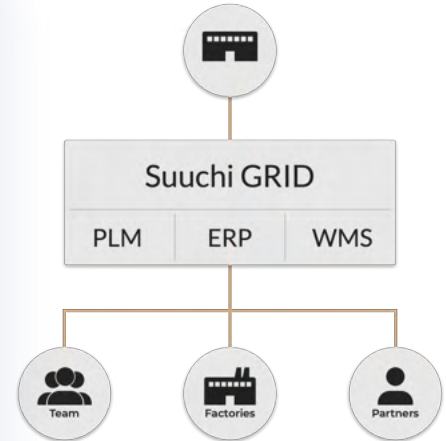

The GRID democratizes access, and builds connected, intelligent & scalable supply chains.

Companies see 5X to 15X ROI as a function of reduced personnel overhead, reduced COGS/higher gross margins, and improved sales.

Before the GRID

With the GRID

The GRID Provides

Democratized access for all participants improving communication, collaboration, and data integrity

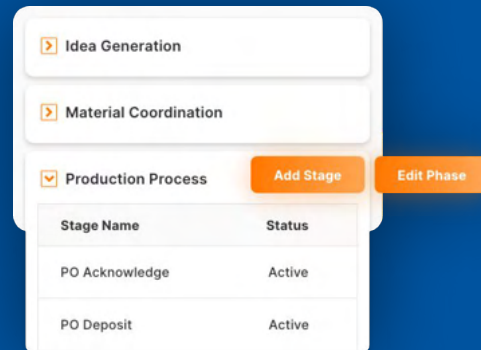

A comprehensive and connected product suite, whether integrating with other software programs or used as a standalone platform

Ability to create, manage and improve workflows across upstream and downstream supply chain activities

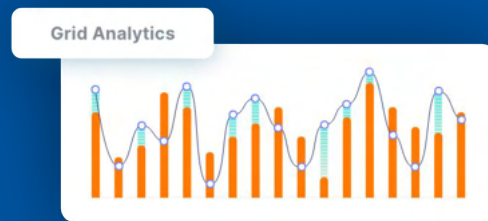

Powerful analytics and reporting by merging previously disconnected data sets

The screenshot displays the GRID interface with a list of stages on the left and a table of production process data on the right. The stages listed are 'Idea Generation', 'Material Coordination', and 'Production Process'. The 'Production Process' stage is selected, and a table of data is shown next to it. The table has two columns: 'Stage Name' and 'Status'. The data rows are 'PO Acknowledge' (Active) and 'PO Deposit' (Active). There are also 'Add Stage' and 'Edit Phase' buttons next to the 'Production Process' stage.

Stage Name	Status
PO Acknowledge	Active
PO Deposit	Active

**GRID Engagement
model covers each
supply chain's
workflow needs and
delivers high ROI.**

Annual platform subscription

Unlimited external users (currently)

Single tenant instance

Services tier to address customizations
and configurations

Why Suuchi & the GRID?

Better Integration across suite of products, and with underlying technology and systems of record

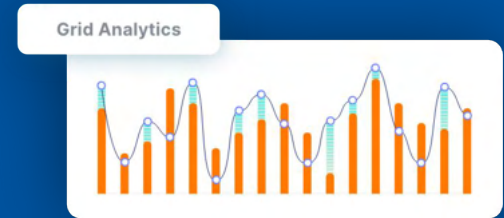

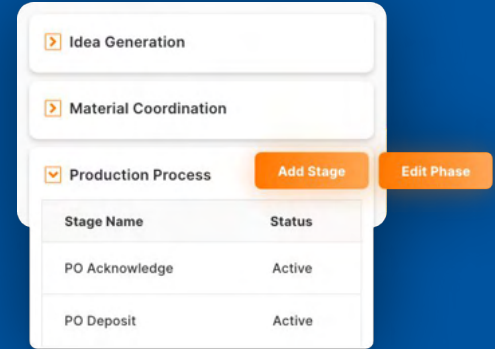

Common middleware functionality supercharges RoI from supply chain operations

Homogenous UI and UX means that training time and time to RoI is greatly reduced when buying additional GRID products

End-to-end supply chain platform offers price bundling advantages

Upstream Product Management

Dynamic Product Management Workflows On The Grid

Upstream Product Management (PLM)

Efficiently oversee every stage of the product life cycle, spanning from collection development to distribution.

- Consolidate all files and digital assets within the GRID platform, eliminating reliance on Excel.
- Generate comprehensive reports on ongoing developments, proactively addressing overdue and high-risk tasks.
- Leverage inventory data in conjunction with PLM information to optimize purchasing strategies.

Communication & Collaboration

Communication & Collaboration

Enable seamless real-time communication from product ideation to distribution:

- Streamline communication by empowering users to provide product-level comments and review features.
- Optimize collaboration by utilizing built-in video conferencing within the GRID platform, eliminating the need for multiple communication tools.
- Efficiently upload files and provide comments throughout every stage of the product life cycle.
- Facilitate direct communication with suppliers, manufacturers, and distributors for faster and more effective collaboration.

COLLABORATE IN REAL TIME

Provide Feedback And Comments Across Every Aspect Of The System, Allowing For Improved Communication

The screenshot displays the Suuchi GRID system interface. The top navigation bar includes the Suuchi GRID logo, a search bar, and user profile information for 'Suuchi GRID Admin'. The main content area is divided into two panels. The left panel shows product details for 'W Wide Pants', including classification, item name, item number, company, item type, category, subcategory, item description, and preferred vendor. The right panel shows a 'Comments' section with a summary and two comments from 'Suuchi GRID Admin' regarding design reviews. Below the product details, there is a table with tabs for 'Item Details', 'Files', 'Manage SKUs', 'Purchase Orders', 'Workflows', 'Linked Items', and 'Inventory'. The 'Workflows' tab is active, showing a table with columns for 'Phases and Stages', 'Assigned To', and 'Status'. The table lists various stages of the product development process, such as 'Mood Board Flow', 'Idea Generation', 'Product Framework & Material Analysis', 'Material Sampling', 'Initial Quotation', 'Briefing Document', and 'Market Research', each with an assigned user and a status (Completed, In Progress, Not Started, or Hold).

Phases and Stages	Assigned To	Status
Mood Board Flow		
Approval Process	Suuchi GRID Admin	Completed
Image Collection Build Out	Suuchi GRID Admin	Completed
Initial Product Specs Build Out	Luke Lap	In Progress
Idea Generation		
Idea Generation	Suuchi GRID Admin	In Progress
Product Framework & Material Analysis	Suuchi GRID Admin	In Progress
Material Sampling	Luke Lap	Not Started
Initial Quotation	Luke Lap	Not Started
Briefing Document	Suuchi GRID Admin	Hold
Market Research	Suuchi GRID Admin	Hold

EMAIL INTEGRATION

Send Emails Directly From The GRID, Streamlining Communication Between Partners

The screenshot displays the Suuchi GRID Admin interface. At the top, there's a navigation bar with a search bar labeled 'Search Comments, Files, Chats' and a user profile icon labeled 'Suuchi GRID Admin'. Below the navigation bar, there's a filter section with dropdowns for 'Sender', 'Recipient', 'Date Range', 'Has Attachment', and 'Module', followed by a 'Search' button. The main content area features a table with the following columns: 'Sender', 'Recipients', 'Date and Time', 'Message', 'Has Attachment', 'Module', and 'Link to Comment'. The table lists 18 email entries. The first entry shows a message from 'testdk370@gmail.com' to 'rahul1@yopail.com' with the subject 'great thanks!'. The last entry shows a message from 'rahul1@yopail.com' to 'rahul1@yopail.com' with the subject 'hi'. At the bottom of the table, there's a pagination bar showing 'Items Per Page' set to 25, and a page indicator '1 of 1'.

Vendor Management

Vendor & Customer Management

Offer a sense of reassurance to your critical stakeholders:

- Evaluate vendors, factories, and mills based on their compliance, sustainability, and execution capabilities for assigning factory responsibilities.
- Promote transparency among all stakeholders by establishing a centralized and reliable source of information.
- Minimize time and costs associated with vendor and supplier management.
- Establish and maintain an ethically sound and transparent supply chain.
